

# Malmö, Sweden

Malmö Terminal is located on the south western coast of Sweden at the port of Malmö and is ideally located to serve the region's chemical cluster.

The port, which is operated by Copenhagen Malmö Port (CMP), is ice free all year round and has no tidal restrictions. Providing a logistics hub for the Baltic Region, the terminal offers excellent sea connections and convenient road and rail links to Copenhagen in Denmark via the Øresund Bridge and to Central Europe through Denmark.

#### History and development

Joining Inter Terminals' European storage network in June 2015, Malmö Terminal has a history of high investment levels and is fully equipped and configured to meet the storage, handling and distribution demands of local industry and export markets. It has an extensive range of tank

capacities up to 20,000m<sup>3</sup> across 27 tanks and offers potential for future growth.

#### Technical skills

In addition to its strategic location in the logistical flow of products within Europe, Malmö Terminal offers technical expertise in the safe storage and handling of products, including bitumen. Dedicated systems and specialist services are available including blending, heated tanks, nitrogen blanketing, and customs and tax bonded storage.

Accessible by vessel, barge, truck and pipeline, Malmö Terminal offers optimum logistics flexibility for importers and exporters.

#### Facilities facts

- 66,000m<sup>3</sup> of storage
- mild and coated steel tanks
- heated storage
- access by vessel, barge, truck
