Gävle Terminal is situated on Sweden's east coast at the Port of Gävle. Its location, just north of the Greater Stockholm region, provides convenient inland access to Sweden's thriving industrial centres and Baltic Sea product flows.

■ Oils ■ Biofuels

The terminal offers a strategic storage and handling hub for a variety of oil products, including fuel oil, vegetable oils, and jet fuel for Stockholm's Arlanda international airport. Aircraft fuel is received into the terminal and loaded via a fully automated rail loading facility onto a daily shuttle train to the airport. In addition to comprehensive rail loading, the terminal also offers dedicated road tanker loading bays and vessel access via two jetties. The terminal has an extensive range of tank capacities up to 35,000m³ across 12 tanks and offers potential for future growth.

Technical skills

Gävle Terminal's strategic location is complemented by a wealth of technical expertise in the safe storage and handling of oil products, specifically jet fuel. The terminal offers a comprehensive service package including an automated rail loading facility, road tanker loading bays, product blending, heated tanks, customs and tax warehousing.

The terminal provides highly flexible storage facilities for the import, export and distribution of product by water, road and rail.

Tank capacities

Capacity	Number
> 10,000m ³	6
> 5,000m ³	5
> 2,500m ³	1

Total capacity of 157,000m³ in 12 tanks ranging from 2,700 – 35,000m³
